

COMPREHENSIVE EYE TEST REPORT

Patient Information

Name:	Teja Kumar Narayana
Date of Birth:	2005-06-27
Patient ID:	12345678

Preliminary Test Results

Preliminary Analysis Report

Parameter	Value
HER	1.173
VER	1.082
Horizontal Squint	No
Vertical Squint	No

Hirschberg Test Results

Detailed Analysis Report

Measurement	Value
Left Vertical (LV)	3.00px
Left Horizontal (LH)	4.00px
Right Vertical (RV)	3.16px
Right Horizontal (RH)	5.10px
Left Iris White Spot	0.00 px
Right Iris White Spot	0.00 px
Right Vertical Distance (RVD)	N/A
Right Horizontal Distance (RHD)	N/A
Left Vertical Distance (LVD)	N/A

Left Horizontal Distance (LHD)	N/A
--------------------------------	-----

R_Lower	9.43
L_Lateral	30.02
L_Medial	23.19
L_Upper	9.22
L_Lower	10.82

A and V Pattern Analysis

To determine A or V pattern strabismus, we compare horizontal deviations across gaze directions:

Deviation is calculated for each gaze as:

$(\text{Right Lateral} - \text{Right Medial}) + (\text{Left Lateral} - \text{Left Medial})$

We average the deviations from:

- Upgaze: gaze_1.jpg, gaze_2.jpg, gaze_3.jpg
- Downgaze: gaze_7.jpg, gaze_8.jpg, gaze_9.jpg
- Primary Gaze: gaze_5.jpg

The difference between Upgaze and Downgaze helps detect patterns:

- If Up - Down ≤ -10 : A-pattern
- If Up - Down ≥ 15 : V-pattern
- Else: No pattern detected

Calculated horizontal deviation values:

Average Upgaze Deviation: -10.69

Average Downgaze Deviation: -8.68

Primary Gaze Deviation: -8.22

Deviation Difference (Up - Down): -2.01

Pattern Result: No A or V pattern detected

A and V Pattern Analysis

To determine A or V pattern strabismus, we compare horizontal deviations across gaze directions:

Deviation is calculated for each gaze as:

$(\text{Right Lateral} - \text{Right Medial}) + (\text{Left Lateral} - \text{Left Medial})$

We average the deviations from:

- Upgaze (gaze_1.jpg, gaze_2.jpg, gaze_3.jpg):

Values: -15.30 -10.20 -6.58

Average: -10.69

- Downgaze (gaze_7.jpg, gaze_8.jpg, gaze_9.jpg):

Values: -11.13 -7.18 -7.74

Average: -8.68

- Primary Gaze (gaze_5.jpg):

Value: -8.22

The difference between Upgaze and Downgaze helps detect patterns:

- If Up - Down $\leq$ -10: A-pattern

- If Up - Down $\geq$ 15: V-pattern

- Else: No pattern detected

Calculated Difference (Up - Down): -2.01

Final Pattern Result: No A or V pattern detected
