

Comprehensive Ocular Alignment Report

Strabismus Screening - Preliminary, Hirschberg & 9-Gaze Assessment

REPORT ID: EYT-2026-000054

Generated: 02 Jul 2026, 14:01 PM

PATIENT NAME vijay
PATIENT ID 2672
DATE OF BIRTH 15_01_2000
EXAM DATE 02-07-2026

REFERRING PHYSICIAN Dr. A. Narayana, MBBS
EXAMINING TECH. T. Kumar
DEVICE EyeYantra v1.0
SESSION #33

1 Preliminary Screening

CAPTURED - CLEAR

Basic eye-alignment screening - corneal landmark detection (RT/RR, LT/LR)

LANDMARK	REGION / DESCRIPTION	STATUS
RT / RR	Right eye - temporal / pupil reflex	Within normal limits
LT / LR	Left eye - temporal / pupil reflex	Within normal limits

Preliminary Clinical Impression:

No gross misalignment detected at preliminary screening. Proceed to Hirschberg and 9-Gaze testing for confirmation.

2 Hirschberg Corneal Reflex

CAPTURED - CLEAR

Corneal light-reflex position relative to pupil centre, both eyes

EYE	REFLEX POSITION	ESTIMATED DEVIATION
Left	Within normal limits	0°
Right	Slightly nasal	-5.0°

Reflex Localization Clinical Impression:

No gross misalignment detected. Normal corneal light reflex.

3 Nine-Position Gaze Test

DEVIATION NOTED

Ocular rotation assessed across all nine cardinal gaze positions

POS.	DIRECTION	R_LATERAL	R_MEDIAL	L_LATERAL	L_MEDIAL
1	Up-Left	-	-1	0	-
2	Up	-	-	-	-
3	Up-Right	-1	-	-	-1
4	Left	-	-2	0	-
5	Primary	-	-	-	-
6	Right	-1	-	-	-1
7	Down-Left	-	-2	-2	-
8	Down	-	-	-	-
9	Down-Right	-2	-	-	-1

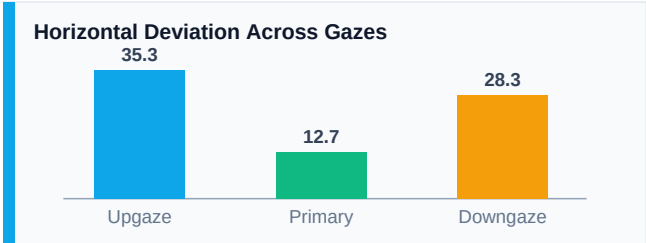

4 Strabismus Pattern Analysis

PATTERN DETECTED

Horizontal deviation compared across upgaze and downgaze positions

35.33	AVG. UPGAZE DEVIATION
28.35	AVG. DOWNGAZE DEVIATION
12.71	PRIMARY GAZE DEVIATION
6.99	UP-DOWN DIFFERENCE

Deviation increases in upgaze relative to downgaze beyond the primary-gaze baseline, consistent with a V-pattern horizontal deviation. Clinical correlation advised.

5 Clinical Impression

Automated eye test analysis reports a 'V-pattern detected' based on vertical gaze differences. Corneal light reflex landmark positions and reflex deviations measured on Hirschberg test confirm alignment details. Findings are within the range typically followed up with comprehensive orthoptic examination. This report is generated by the EyeYantra automated ocular-alignment analysis system and is intended to support -- not replace -- clinical evaluation by a qualified ophthalmologist.
